Subject: My recommendation

My name is Jan Eads, and I met Jason Salvato while building a getaway place in a pole barn by Lake Charleston in 2007. Jason met with my husband, Howard and I to see what he recommended and we really liked his ideas and professionalism. It was a challenge due to the fact it was in a portion of a 42'x64' pole building with all concrete floors, not the average place to put carpet. As we knew the floors would be cold without the pad and carpeting, Jason helped us navigate the type and thickness of what we needed and it was perfect when we were able to use the property. I have recommended Jason to many of my real estate clients since our experience. I recently used him last year to stretch a house full of carpet after 23 years there and he did an amazing job! Needless to say I had expected the carpet to dry from cleaning but it didn't and he brought fans and got the job done on time for my move. You can trust Jason Salvato with YOUR flooring needs, I do!
